

Converting **आपदा** into **अवसर** with **आवरण**

Aavran: A COVID-19 Response Initiative

'Aavran' aims at providing Khadi and Cotton face masks at highly affordable rates and simultaneously **generating employment opportunities for the poverty-stricken women** who have received a massive economic blow during these unprecedented and turbulent times.

Our **women entrepreneurs** are **unsung heroes**- to their families for earning their bread, to the common man struggling to acquire masks on account of acute shortage and to nature for creating reusable masks that avert wasteful tendencies.

Aavran Face Masks

BREATHABLE

Our masks are permeable, therefore, ensure better breathability than N95 masks and other masks that are available in market.

COMFORTABLE

The Fabric is procured from registered and reputed organisations, hence, we provide full assurance about the quality and comfort.

REUSABLE

Unlike Surgical Masks, our masks are reusable and can be used for more than 2 months. Hence, Aavran Masks reduce waste generation exponentially.

HIGHEST STANDARDS OF SAFETY

Highest standards of precautionary measures are taken during the manufacturing process. Women themselves wear masks while working, they are sanitised before entering the centre, temperature check is done regularly. The workplace is sanitised completely, every two days.

Khadi Masks

WHY KHADI?

Khadi, symbolic of Nationalism, is a versatile eco-friendly fabric that has the unique property of keeping the wearer cool in summers and warm in winters.
